

Saturday 20th March & Sunday 21st March 2010 Sydney, NSW

\$900.00 + GST.

Includes extensive reference material in full colour with many images.

Morning tea, Lunch and afternoon tea will also be provided.

Time: 8.30am to 5pm both days

Venue: Chevalier Resource Centre, 1 Roma Avenue, Kensington NSW 2033

Bookings: Pagle Health Solutions - Ph: 1300 724 537 or Fax: 1300 724 538

Dr. Trevor Douglas PhD

Dr. Trevor Douglas holds an Honours Degree in Biochemistry (1969) and a PhD in Plant Physiology and Agricultural Biochemistry (1975) from the University of Adelaide. After completing his academic qualifications he worked as a research scientist in hospital, university, and other research centres, both in Australia and overseas for approximately 12 years - primarily in cholesterol, plant sterols, steroids, lipids, and membrane biochemistry. His last research position was as a Principle Research Scientist with CSIRO, Division of Horticulture, in Merbein, Victoria. During the time Dr. Douglas worked in research he published over 30 major research articles in international journals and books. Dr. Douglas also held two University lecturer positions - one at the University of Ghana, West Africa (1974/1975) and a Visiting Professorship at the University of Calgary, Alberta Canada (1980/1981).

Dr. Douglas is scientific adviser and a director of the Science Art Research Centre, Australia, and an Honorary Professor of the Albert Schweitzer University, London which focuses on humanitarian issues.

His extensive scientific background combined with many years of cumulative knowledge in natural health management and medical technology put him at the forefront in the naturopathic industry in Australia and made him a very popular speaker at many association meetings, seminars, and integrative medicine conferences.

In the early 1990's, Dr. Douglas studied Naturopathy and Nutritional Therapy, studied the Bradford Blood microscopy techniques (HRBM and HLB) under the direction of Dr. Robert

Bradford and Dr. Harold Klassen, joined the Complementary Medicine Association (CMA), and soon became one of Australia's most successful Nutritional Biochemists/ Naturopaths. In this capacity, Dr. Douglas, in many ways, acted as a bridge between the orthodox medical and naturopathic professions because of his wealth of knowledge and academic credibility. Trevor spent over 10 years as an Executive Member/Director of the CMA and in 2003 was awarded a Fellowship in honour of his significant contribution to the Natural Health Industry in Australia.

During the 15 years that Dr. Douglas worked as a Nutritional Biochemist/Naturopath he consulted with over 12,000 patients at his clinic and used mainly blood microscopy tests as a means of determining the health status of the patients. From the wealth of knowledge he accumulated in this area he developed the Live Blood Morphology and Coagulated Blood Morphology tests. He has subsequently trained both medical practitioners and naturopaths in these techniques that combine information from dark field, phase contrast, differential interference and bright field examination of the blood. He also teaches dark field Live Blood Analysis in conjunction with the use of Sanum products.

These blood microscopy tests provide the practitioner with arguably the most practical, way of assessing the state of health of a patient and complement other techniques such as Eye Diagnosis, Magnagraph, and Symptomatology and Diagnosis etc.

Trevor's courses are very informative and his enthusiasm for the use of these techniques makes them a must for any practitioner who wants to do their best for the health care of their patients.

David Woolcott, Naturopath

David's depth of knowledge and enthusiasm for Natural Therapy is the direct result of over 26 years of hands-on clinical experience. He has lectured at the College of Somatic Studies on Eye Diagnosis and Myorthotics, has acted as a Support Lecturer in the area of Urine Analysis for Dr Jay Das Phd, and has lectured extensively on product knowledge and the practical use of Vitamins, Minerals, Herbs and Amino Acids to Practitioners and Students. David has also toured throughout Australia with a series of lectures on Sanum Therapy alongside Dr Hilbert Seeger Phd (Medicine).

He has received an Outstanding service award by the Australian Institute of Holistic Medicine in 1995 for his contribution to

education in the field of Natural Therapies. He was also honoured with a Community Service Award in 1999 'in Recognition of Service Rendered to Promote Natural Medicine in the Community' by the Australian Institute of Holistic Medicine.

David was one of the founding Members of the Complementary Medicine Association, receiving a Service Award for his valuable contribution to the Association while serving on the Federal Executive of Complementary Medicine Association.

David is the founder of Advanced Medicine Australia range of products. He is also responsible for the Sanum product in Australia.

Live Blood Training

By Dr. Trevor Douglas PhD

The connection with blood, Sanum therapy and nutrition.

An Ideal opportunity to learn live blood and keep up to date with the latest information coming out around the world.

Advanced Medicine Australia & Sanum is proud to endorse Dr Trevor Douglas as the official trainer in live blood with the connection to Professor Günther Enderlein and Sanum Therapy.

Areas covered include:

- Full training in live blood.
- The connection with Sanum and Sanum Products.
- The role Microbes play in Blood.
- The outright connection to Acidity and it's unique shift to alkalosis seen in Blood.

This live blood training is one not to be missed.

Lecturer: Dr Trevor Douglas PHD

Support Lecturer: David Woolcott, Naturopath.

This course will cover:

Live Blood Analysis (LBA) Dark Field and Beyond

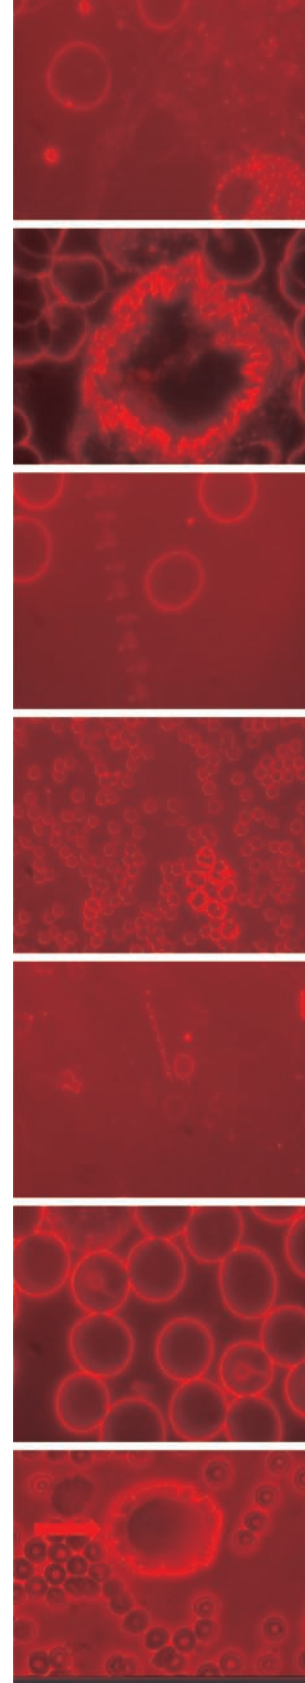

This is a 2 Day course on dark field microscopy, outlining how observations from the blood can be used by practitioners in conjunction with Sanum Therapy as developed by Professor Günther Enderlein. Professor Günther Enderlein was able to tell the difference between natural healing processes and pathological developments.

This is an excellent introduction to Live Blood Morphology. The course explains why the blood is an ideal medium to examine in order to ascertain a person's health status and provides the practitioner with a comprehensive album of dark field microscopy photographs of 'normal' and 'abnormal' blood cells and other blood elements and offers probable indications for each observation.

The course also introduces the history of disease, theories of pleomorphism and monomorphism, updates on Enderlein's work, and introduces the concept of isopathy and the use of Sanum products (specific biological remedies) to help regulate the natural healing microbes and nutrition to restore the body to ideal pH and thus allow the body to attain a state of good health.

Investment: \$900.00 + GST.

Includes extensive course notes and photographs of the blood for reference purposes. Morning tea, Lunch and afternoon tea will also be provided.

Some of the areas we will cover:

- How to prepare the patient to take a good blood sample.
- Understanding Pleomorphism & Monomorphism.
- You will see and understand the three stages of microbes and how they present in the blood.
- We will give a short understanding of the Sanum remedies and how they are unique.
- It will be fully explained why blood is an ideal medium to examine in order to ascertain a person's health.

If you have done other live blood courses and wish to go the next step to explain some of the unexplained organisms you see in blood, then do this course!

- Sanum Therapy and how to prescribe.
- You will see the true connection to Acid Stress and the blood.
- You will see the microbial stage, the Bacterial stage and the Fungal stage in the blood.
- You will see a healthy immune system versus an unhealthy immune System.
- The connection between Microbes, Bacterial, Fungal Infection, Viruses and ill health and chronic disease.
- You will see the connection between Haptens and the Red blood cells.
- The indicators that point to bladder infection.
